

The Alan Turing Institute

Research Associate/Senior Research Associate, AI Standards

THE ALAN TURING INSTITUTE

There has never been a more significant time to work in data science and AI. There is recognition of the importance of these technologies to our economic and social future: the so-called fourth industrial revolution. The technical challenge of keeping our data secure and private has grown in its urgency and importance. At the same time, voices from academia, industry, and government are coming together to debate how these technologies should be governed and managed.

The Alan Turing Institute, as the UK's national institute for data science and artificial intelligence, plays an important part in driving forward advances in these technologies in order to change the world for the better.

The Institute is named in honour of Alan Turing, whose pioneering work in theoretical and applied mathematics, engineering and computing is considered to have laid the foundations for modern-day data science and artificial intelligence. The Institute's goals are to undertake world-class research, apply its research to real-world problems, driving economic impact and societal good, lead the training of a new generation of scientists, and shape the public conversation around data and algorithms.

After launching in 2015 with government funding from EPSRC and five founding universities, the Institute has grown an extensive network of university partners from across the UK and launched a number of major partnerships with industry, public and third sector. Today it is home to more than 500 researchers, a rapidly growing team of in house research software engineers and data scientists and a business team.

BACKGROUND

THE AI STANDARDS HUB AND THE PUBLIC POLICY PROGRAMME

Standards, specifications, and related documents produced by international standards development organisations (SDOs) such as ISO, IEC, IEEE, CEN-CENELC, or ETSI are set to play an increasingly significant role as governance and innovation mechanisms for AI technologies. Recent years have seen the emergence of a dynamic and complex landscape of AI standards development initiatives, accompanied by legislative and regulatory proposals that rely on standards as a mechanism for achieving their objectives.

The AI Standards Hub is a new and high profile UK initiative dedicated to this rapidly evolving space. The Hub's mission is to pursue strategic research and to engage stakeholders across industry, government, regulators, civil society, and academia with a view to shaping the direction of AI standardisation, increasing participation, and enabling the informed use of standards. Led by the Turing, in partnership with the British Standards Institution (BSI) and the National Physical Laboratory (NPL), and supported by the UK Government, the AI Standards Hub is based on objectives set out in the National AI Strategy.

The AI Standards Hub team sits within the Public Policy Programme at The Alan Turing Institute. The Public Policy Programme works alongside policymakers, regulators, and international organisations to explore how data-driven public service provision and policy innovation might help solve long-running societal problems. The Programme carries out interdisciplinary academic research on a wide variety of topics, from identifying policy priorities using agent computing to quantifying online hate speech.

ROLE PURPOSE

We are recruiting a Research Associate or Senior Research Associate to join the AI Standards Hub team. The successful candidate will report to the Head of AI Governance and Regulatory Innovation and will play a central role in delivering the Hub's work. The post holder will join the team at an exciting time, helping to build this new, high profile initiative and set it up for success. We aim to become a point of reference in the global conversation around AI standards. The post holder will not only help us lay the foundations to ensure that we will reach our goals, but also have opportunities to grow alongside the initiative.

The Alan Turing Institute

Depending on the candidate's background and area of expertise, the successful candidate will have the opportunity to get involved in the following fields of activity:

- Generating interdisciplinary research and thought leadership on AI standardisation that combines technical and non-technical approaches to integrate questions of safety and interoperability with broader considerations of ethics, trustworthiness, and responsible innovation.
- Getting involved in stakeholder engagement, community building, and collaborative knowledge production focused on the ethical and societal challenges brought about by AI and the role that standards can play in addressing these challenges.
- Examining the relationship between standards and regulation in the context of evolving AI governance frameworks in the UK and internationally.
- Developing resources, tools, and training materials to equip diverse stakeholders with the knowledge they need not only to contribute to standards development, but also to assess and use published standards.

DUTIES AND AREAS OF RESPONSIBILITY

The core responsibilities of this role are as follows:

- Contributing to the AI Standards Hub's research agenda by conducting research and preparing publications on trends, gaps, and best practices concerning the development of standards for AI technologies.
- Assessing AI standardisation initiatives and relevant legislative and policy developments.
- Delivering workshops, roundtables, and conferences for the AI Standards Hub community to inform the AI Standards Hub's research agenda and strategic direction.

Additional responsibilities of this role might include:

- Building and managing strategic relationships across different communities, including academic collaborators, policymakers, regulators, industry, and standards development organisations.
- Identifying and pursuing strategies for amplifying the reach and impact of work among national and international audiences in collaboration with the Turing's communications team.
- Designing educational materials and co-delivering training activities.
- Feeding into the development of innovative online resources and platforms that coalesce a community around the development of AI standards

If appointed at a Senior Research Associate level, the post-holder will have additional responsibilities, such as:

- Overseeing the work of other Research Assistants or Associates who are conducting research in related areas.
- Defining the research direction in collaboration with the leadership team of the AI Standards Hub.
- Taking the lead on writing up findings as they emerge, producing reports, and developing publications in peer reviewed journals, in collaboration with the research team.

Please note that job descriptions cannot be exhaustive, and the postholder may be required to undertake other duties, which are broadly in line with the above key responsibilities. This job description is written at a specific time and is subject to changes as the demands of the Institute and the role develop.

The Alan Turing Institute

PERSON SPECIFICATION		
Skills and Requirements	Essential (E) Desirable (D)	Tested at application (A) Tested at interview (I)
Post holders will be expected to demonstrate the following		
Education/Qualification		
Research Associate/Senior Research Associate level: A PhD or an equivalent level of professional experience in a relevant field that equips the postholder with the skills needed to engage with and conduct research on standardisation related to AI technologies.	E	A
Knowledge and Experience		
Senior Research Associate level - significant postdoctoral research experience	E	A, I
An excellent understanding of technical as well as governance-related aspects concerning the design, development, and use of AI technologies.	E	A, I
An interest in and a general understanding of the role of international standards as a technology governance tool	D	A, I
Knowledge of the international landscape of relevant standards development organisations and familiarity with procedural and substantive aspects of standards development	D	A, I
Familiarity with legislative and regulatory developments related to AI technologies at the national and international level	D	A, I
Experience in a relevant non-academic environment, such as a standards development organisation, technology company, or regulatory agency	D	A, I
A record of scientific publication, which may include journal articles, book chapters, and policy reports/white papers, according to career stage	E	A, I
Communication		
Excellent written and verbal communication skills	E	A, I
Ability to communicate research outputs clearly and persuasively to diverse audiences	E	A, I
Ability to explain complex/specialist information and technical concepts in ways that are understandable to non-experts	E	A, I
Teamwork and Motivation		
Ability to collaborate successfully in a multidisciplinary environment across different levels of seniority	E	A, I
Liaison and Networking		
Experience in building professional relationships with a diverse range of stakeholders	D	A, I
Planning and Organising		
Ability to work flexibly, prioritising tasks to meet deadlines and maintaining a high standard and attention to detail	E	A, I

The Alan Turing Institute

Analysis and Research		
Demonstrated ability to carry out original research and to produce published research papers	E	A, I
Team Development		
Interest in and willingness to support the development of other team members	E	A, I
Other Requirements		
Commitment to EDI principles and to the Organisation values	E	I

The Alan Turing Institute

OUR VALUES

The Alan Turing Institute is committed to equality diversity and inclusion and to eliminating discrimination. All employees are expected to embrace, follow and promote our [EDI Principles](#) and Our Values.

APPLICATION PROCEDURE

If you are interested in this opportunity, please click the apply button below. You will need to register on the applicant portal and complete the application form including your CV and covering letter. Please include a sample piece of writing (a journal article, conference paper, book chapter, or similar research piece) and a list of publications. If you have questions about the role or would like to apply using a different format, please contact us on 020 3970 2148 or 0203 862 3340, or email recruitment@turing.ac.uk.

CLOSING DATE FOR APPLICATIONS: 05 September 2022 at 23:59

TERMS AND CONDITIONS

This full time post is offered on a fixed term basis for 2 years. Depending on their level of experience, candidates may be appointed as Research Associates or Senior Research Associates.

The annual salary is £38,850 - £46,200 for a Research Associate and £49,025 - £52,500 for a Senior Research Associate, plus excellent benefits, including flexible working and family friendly policies, <https://www.turing.ac.uk/work-turing/why-work-turing/employee-benefits>

EQUALITY, DIVERSITY AND INCLUSION

The Alan Turing Institute is committed to creating an environment where diversity is valued and everyone is treated fairly. In accordance with the Equality Act, we welcome applications from anyone who meets the specific criteria of the post regardless of age, disability, ethnicity, gender reassignment, marital or civil partnership status, pregnancy and maternity, religion or belief, sex and sexual orientation.

We are committed to building a diverse community and would like our leadership team to reflect this. We therefore welcome applications from the broadest spectrum of backgrounds.

Reasonable adjustments to the interview process will be made for any candidates with a disability.

Please note all offers of employment are subject to obtaining and retaining the right to work in the UK and satisfactory pre-employment security screening which includes a DBS Check.

Full details on the pre-employment screening process can be requested from HR@turing.ac.uk.
