# About Development Initiatives

Development Initiatives applies the power of data and evidence to build sustainable solutions.

Our mission is to work closely with partners to ensure data-driven evidence and analysis are used effectively in policy and practice to end poverty, reduce inequality and increase resilience.

While data alone cannot bring about a better world, it is vital to achieving it. Data has the power to unlock insight, shine a light on progress and empower people to increase accountability.

We focus on three core areas to maximise our impact and achieve our mission:

- Strengthen data ecosystems and improve data quality by helping others to collect, share and manage data and use data responsibly and effectively
- Increase use of high-quality, actionable and data-driven analysis that can be used in policy and practice
- Create a culture of data use by growing people's skills, expertise and confidence in data.

And we support partners to:

- Better respond to people's needs through improved quality and use of data and evidence in policymaking
- Improve the quantity, quality and coherence of public finance and private investment
- Challenge systemic and structural barriers to equity and support the reform of existing systems.

We work at global, national and local levels, through a global hub connected to a growing network of regional hubs and partners. In the last five years alone our work has covered 78 countries and we currently have staff based in Kenya, Uganda, the US and the UK.
