

Job Title	Senior Web Developer
Band	5
Group	Finance and Infrastructure Services
Responsible to	Head of IT and Digital Services
Responsible for	

Organisational Context:

QAA is the UK's independent quality body for higher education. Founded in 1997, we work with sector stakeholders and students across all four nations of the UK and build international partnerships to enhance and promote the reputation of UK higher education worldwide. Our vision is for world-leading and independently assured higher education.

QAA has changed to meet the evolving needs of a sector that has undergone reform across all nations of the UK. In 2018, the Secretary of State designated QAA as the body responsible for assessing quality and standards in England, and we work closely with the devolved administrations in Scotland, Wales and Northern Ireland. We launched a new membership offer to institutions in August 2019. The Senior Web Developer role within QAA's Finance and Infrastructure Services team is critical to delivery of the Agency's vision and refreshed membership offer.

Role summary

Manage the continuous improvement, development, maintenance and administration of QAA's websites and systems. Responsible for developing web applications around the core requirements of the business, collaboration and enterprise content management, as well as the development and maintenance of the business web systems and the cloud environment in which they are based, and providing strategic insight to ensure development of high quality and innovative software solutions.

Main Duties and Responsibilities

- Responsible for the design, development and maintenance of QAA's web-based business systems, applications (including external websites) and cloud servers, working closely with the Head of IT, Project Manager and Business Analyst.

- Work alongside all business areas to develop and maintain an understanding of the current and future work of QAA and to ensure effective delivery of web-based solutions and support.
- Evaluate, recommend and introduce new technologies to support QAA business requirements including, as appropriate, the design, development, testing and implementation of third-party tools intended to work with QAA's business information systems.
- Act as technical expert for web development. Analyse user requirements, develop technical solutions and deliver change to QAA's existing web systems.
- Manage the overall web development environment. Responsible for all code being maintained, to ensure all QAA web systems can be re-built from first principles.
- Create software design and software development lifecycle documentation and work in a team coding environment to remove single points of failure and maximise knowledge share amongst other members of the IT team.
- Participate in relevant testing processes including unit, system and user acceptance testing.
- Working with the IT team to oversee and coordinate the day-to-day operations and maintenance of QAA's business systems and provide quick responses and fast resolutions to production problems.
- Lead on web system integrations with other QAA core information systems.
- Play an active role in any QAA disaster recovery scenarios alongside the Head of IT.
- Assist with the coaching and mentoring of the Junior Developer.
- Standard SharePoint administration tasks to provide back up support to the IT team.
- Proactively look for improvements to development processes or tools where applicable.

Key Contacts:

- Colleagues across the organisation
- Finance and Resources team members
- Relevant external organisation and outsourced 3rd party organisations.

The job description sets out the main duties of the post at the date when it was drawn up. The duties may vary from time to time without changing the general character of the post or the level of responsibility entailed. Such variations are a common occurrence.
